AN INTRODUCTION TO FRAGOMEN

We are the **largest specialized immigration firm in the world**, representing 60% of the world's most significant multinational corporations globally.

We provide **immigration and related services to clients in over 170 countries** and manage more than **350,000 transactions** worldwide.

We are **European mobility experts across the entire EU region** with a comprehensive array of products and services developed by **leading European immigration professionals**.

We are the **leader in innovative technology** for comprehensive labour mobility solutions in Europe including immigration, posted workers and social security requirements.

THE FRAGOMEN TECHNOLOGY VISION

Our focus is to be a pioneer in the legal industry by integrating cutting-edge Generative AI solutions to deliver superior labour mobility solutions, improve operational efficiency, and drive customer satisfaction around the user experience

OUR OBJECTIVES

Partner with EU institutions and ELA to reach common goals:

Thanks to Fragomen's thought leadership in global immigration, posted worker and social security compliance in Europe, create user friendly access to information.

Enhance user experience and communication:

Leverage AI-powered chatbots and virtual legal assistants for seamless customer interactions and inquiries.

Ensure regulatory compliance:

Develop AI models to allow corporate and individual users to achieve compliance; monitor and advise on evolving legal regulations and compliance standards.

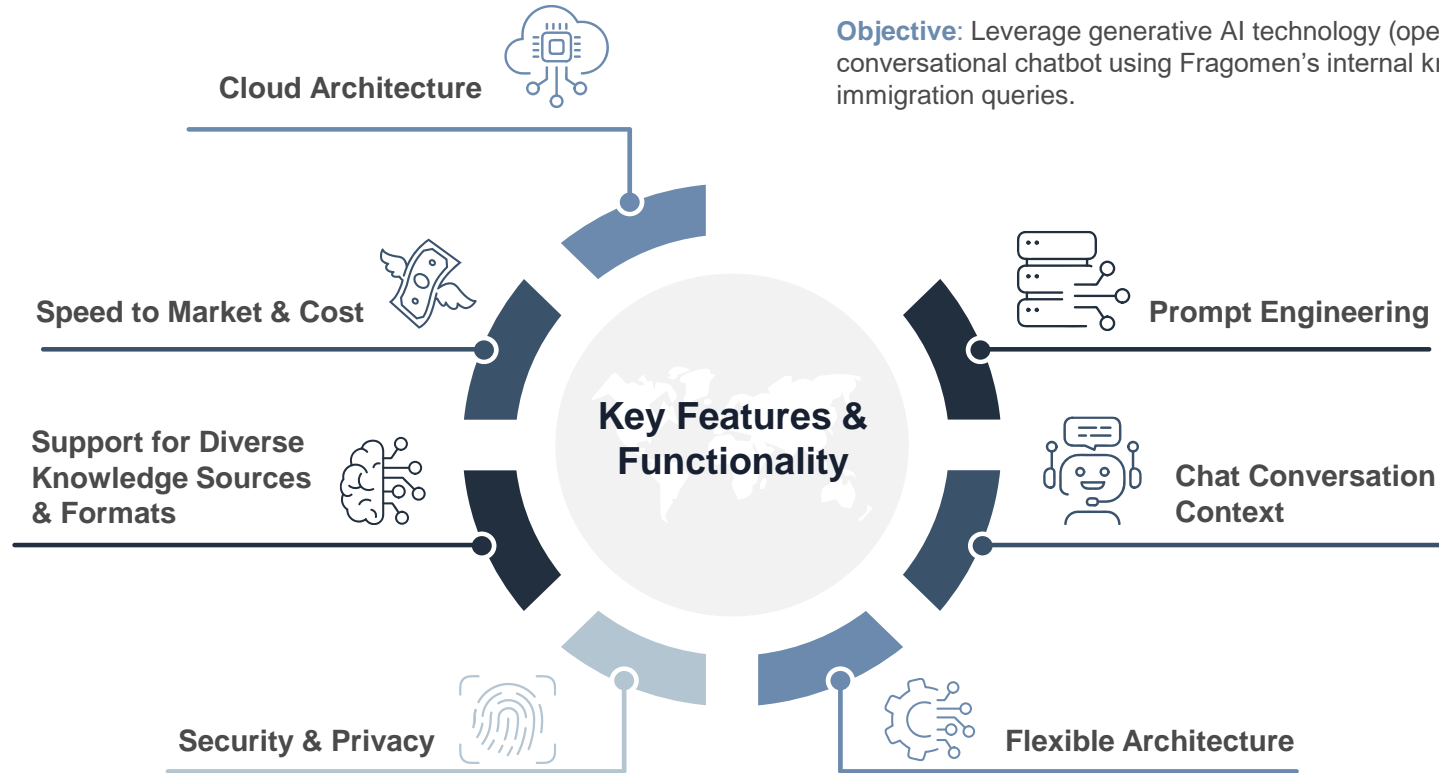

The structure of the platform can be modified for use by EU or member state governments.

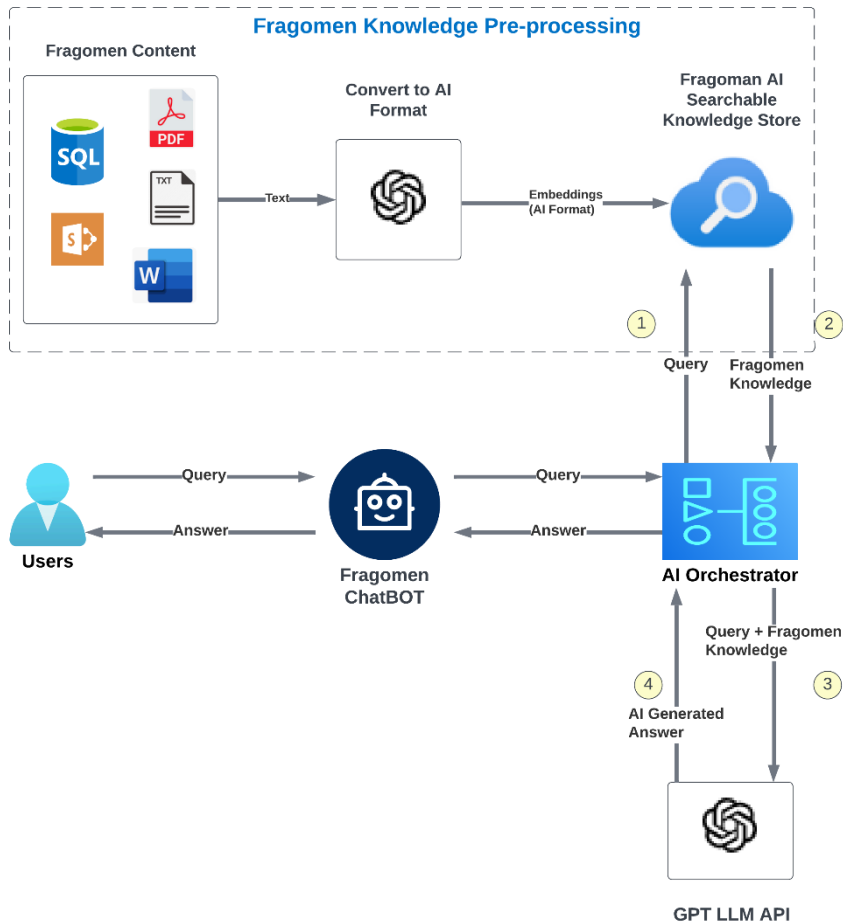

Fragomen's massive Knowledge library powers our technology and streamlines services.

FRAGOMEN GPT POC - FEATURES

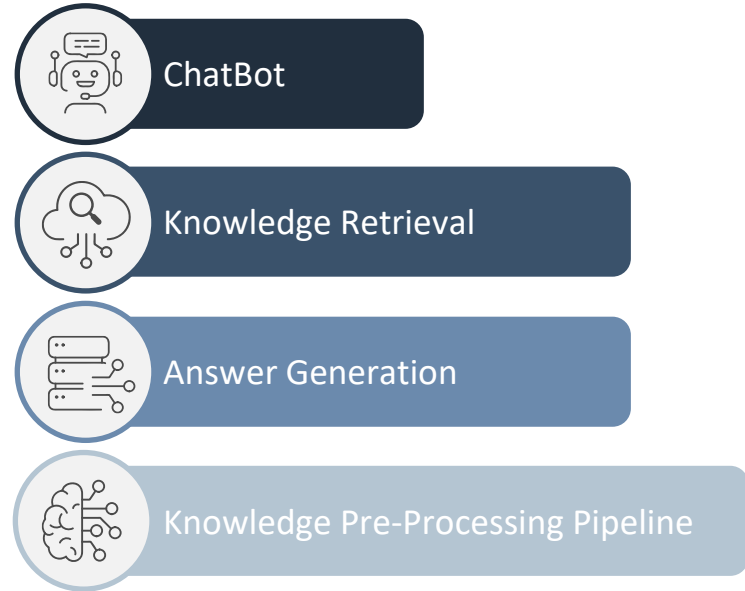

Objective: Leverage generative AI technology (openAI's GPT) to develop a conversational chatbot using Fragomen's internal knowledge to respond to immigration queries.

FRAGOMEN GPT POC – ARCHITECTURE

Architecture components built using Azure AI Services and APIs from openAI.

Fragomen Technology & the EU Agenda

How Fragomen can partner to meet EU objectives and increase European labour mobility effectiveness

1. Creation of EU Talent Pool

Matching platform with innovative Fragomen knowledge & technology on Member States' immigration rules to support international recruitment.

2. EU Immigration Portal and Your Europe Website

Leverage Fragomen AI-empowered chatbot to provide practical information on the obligations for individuals to work and reside in the EU.

3. ELA Web Solution

Feeding Fragomen's massive Knowledge library and database to bring labour mobility information to the user by developing the AI chatbot with easy access to accurate and up to date information enhancing the customer experience.

4. ELA Posting 360 Programme

Leverage Fragomen's vast experience with automated assessments and RPA filing of posted worker notifications in the EU to support the Workgroups of ELA with additional practical guidance for employers that want to post workers into and across Europe.
